- 2004 ~ Non-metallic mining exception granted, reclamation plan approved.
- 2005 ~ Dunnville Cutstone Company Incorporated.

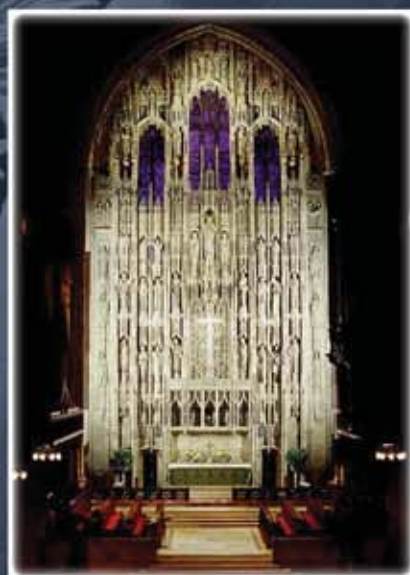

HISTORICAL QUALITIES

HISTORY TENDS TO REPEAT ITSELF. Therefore, it may not be surprising that the historic Dunnville Sandstone is once again available in the modern day stone market. Established in 2005, Dunnville Cutstone Company is proud to be the company to bring this fine stone back to the market.

Dunnville Sandstone is one of the oldest quarried dimensional stones in Wisconsin, if not in the Midwest. From 1910 to 1913, stone carvers constructing the high altar in the Saint Thomas Church in New York billed Dunnville Sandstone *the finest sandstone in the world.*

DUNNVILLE CUTSTONE COMPANY TODAY

Today, the Dunnville Cutstone Company quarries Dunnville Sandstone for use in landscaping, residential and commercial markets. This Dunnville Sandstone is quarried from the same ledges that produced stone for many architecturally significant structures during the original days of the quarry. Our fabrication and distribution relationships throughout the nation can effectively provide Dunnville Sandstone to your projects.
